

## **Course Essentials:**

**Course Title:** How to Invest In Stocks Like Warren Buffett (Even If You're a Beginner)

**Short Description:** Master the Free Cash Flow strategy used by Warren Buffett to spot winning stocks — even if you're just starting out.

## **Learning Objectives:**

By completing this course, you'll no longer rely on luck, trends, or hype — you'll invest based on logic, facts, and value. Like Buffett does:

1. Understand the core principles of value investing
2. Read and interpret financial statements without confusion
3. Identify strong vs. weak businesses using key financial metrics
4. Calculate Free Cash Flow (FCF) and understand why it matters more than earnings
5. Estimate a company's growth rate based on past performance

6. Calculate a stock's intrinsic value using the FCF method
7. Set a margin of safety to buy at a discount and protect your investments
8. Avoid emotional investing by thinking like a long-term owner
9. Build a watchlist with clear buy targets
10. Apply everything learned using the included spreadsheet and real examples

## **Curriculum Outline:**

### **Module 1: The Investor's Mindset**
